### Front End Developer

# Mihailescu Fanush Gabriel

Hello, my name is Fanush and I am a front-end developer. I've been working with front-end development for about a year, and I absolutely love it! I love coming up with creative solutions to problems, and I always enjoy working on projects that are visually appealing. I am currently unemployed because I'm looking to hone my skills even more so I can find a position as a junior front-end developer in the near future. In the meantime, I'm working on developing my portfolio and applying for positions. Some of my work can be seen here on the Frontend Mentor website.
